API Select Collection

Description:
The API Select Collection contains more than 275 documents including manuals (Manual of Petroleum Measurement Standards), specifications, recommended practices, bulletins, standards, and other publications that are predominantly used within the PetroChemical industry.

These documents address equipment and material, offshore production, drilling, transportation, structural pipe, valves, environmental effects, data forms, plus much more.

This dynamic collection of standards is reviewed twice annually to ensure industry-targeted standards are included in the package, and documents of very low usage are removed. A listing of popular documents can be found below, however, do know that the collection is dynamic and the document listing is representative of the types of information included

Online Access - Subscribers get secure online access to search, view, bookmark, track, and print documents according to the license agreement. Online documents are updated daily. Multiple users can share a single license. You also get access to IHS Standards bibliographic data – more than 1 Million documents.

Individual Documents - IHS sell individual documents through the IHS Store in electronic or hard copy formats. Statistics show that 1 out of every 5 people who purchase individual documents would benefit from an online subscription. You should consider a collection over individual document purchases if your company buys more than $3,000 in standards per year.
